AUTOMOTIVE & ELECTRONICS: New Report provides Insights on Responsible Sourcing

Drive Sustainability and the Responsible Minerals Initiative (RMI) just released '**Material Change**', a report that assesses the environmental, social and governance risks of key materials in automotive and electronic industries. As the report provides insights on Responsible sourcing, it sets the basis for future collaboration to enhance **sustainability in the supply chain**.

Forética leads EU Talent project

Information and Communication Technology (ICT) is a key driver of economic and social progress. **CSR Europe** and **Huawei** will bring together 150 people from businesses, politics, international organisations and NGOs to discuss the benefits and challenges of digitalisation for the economy and the labour market. A report prepared by the London School of Economics serves as the basis for the conference.

The Sustainable Development Goals

5 Drivers for sustainability leadership and enhanced competitiveness

Integration, capacity building, collaboration, transparency and regulation are the 5 main drivers for sustainability leadership, in turn leading to competitiveness. In Europe we have the technology, the innovation power, the skills and

expertise, the values and the creativity to leverage this and become a leaders in global growth and prosperity.

Collaborative approach tackles China's sustainability challenges

In China, the automotive industry provides millions of jobs. But in the new era of green growth, the focus now lies on social and environmental responsibility, rather than job creation. Cleaning up China's supply chains will take close collaboration between the automotive companies and their

25.000-part producers.

EU Issue Insight

Sustainable Finance is a flagship initiative of the European Commission

The European Commission (EC) estimated that an annual EUR 180 billion investment in resource-efficient energy and transport is needed to bring sustainability off the ground. Our latest EU Issue Insight '*Financing Sustainable Growth*' highlights

opportunities and hurdles of the EC's Action Plan.
